

HANDSHAKE Mouse

This mouse has a vertical grip.

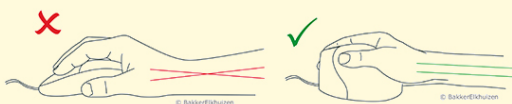

Vertical grip, compact & flexible

The HANDSHAKE Mouse has a vertical grip, two buttons and a scroll wheel. Proper use of this mouse lowers muscle tension.

The HANDSHAKE Mouse is suitable for medium and small hands (hand widths up to 9 cm, not including the thumb).

Thanks to the "handshake" position when using a vertical mouse the wrist doesn't bend sideways too much and the lower arm needs less inward rotation (Schmid et al., 2015). There is less muscle activity in the lower arm than when using a standard mouse (Quemelo & Vieira, 2013).
