

AXIA 2.4

ENHANCED PERFORMANCE.

The Axia 2.4 has an extra high back, making it the perfect fit for tall users while ensuring optimal back support. It is suitable for users that are up to 135kg and features a synchronised mechanism based on the patented Axia principle of pelvic (rather than lumbar) support.

FEATURES (Selected models only)

- Exclusive in design, quality and functionality.
- The extra high back gives the chair status and allure.
- The perfect fit for tall people.
