

CREATING EFFECTIVE WORKING ENVIRONMENTS

STORAGE 800 SERIES MODULAR SHELVING

MADE IN THE UK

800 Series Storage

Modular shelving & seating

A radical evolution of KI's 800 Series steel storage, this new modular shelving & seating system creates beautiful office layouts. Based on a connector module, the system's elegant aesthetic belies its unprecedented versatility, scalability and retrofitability. Offering outstanding value, it can be freestanding or integrated with storage cabinets in a variety of dimensions, functions and styles.

- Fully constructed from powder-coated steel, including joints
- Available in numerous colours
- Can be readily customised for working off-module
- Open & closed units can be created with steel or wood
- Integrated worksurfaces & breakout seating can be added
- Certified Indoor Advantage™ Gold, suitable for WELL Building

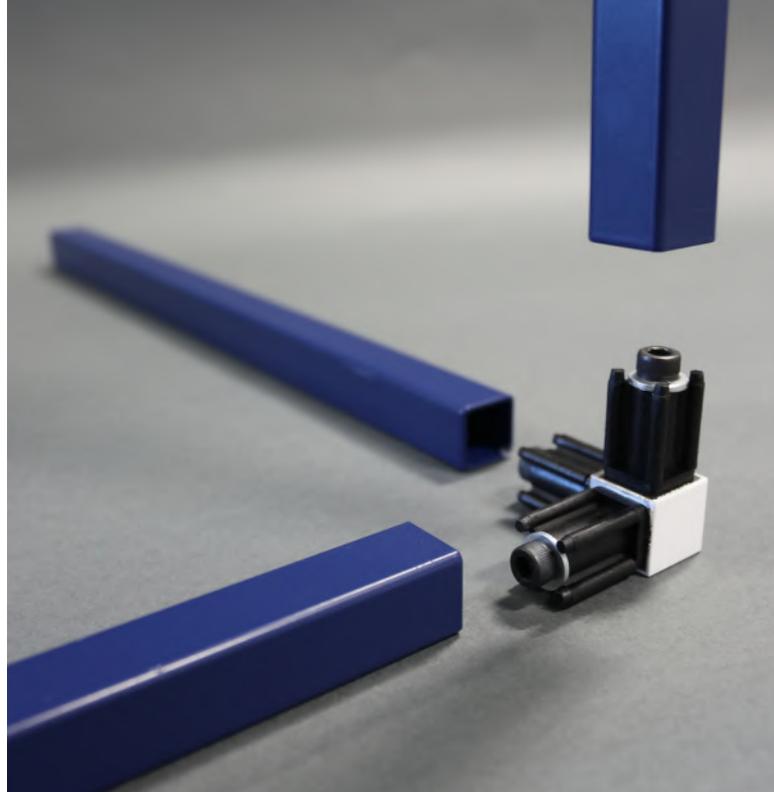

Designed & made in the UK | 25 year warranty

Engineered for unprecedented versatility

Designed and manufactured in the UK, the system follows the same 20mm profile of KI's 800 Series steel storage cabinets. The square tubing can be cut to a variety of lengths before being joined together using unique 3-way, 4-way or 5-way cube connectors. These are also made from steel so can be powder-coated in a matching colour as the rest of the framework.

As the framework is assembled from rods and connectors, it is readily able to go off-module to create variations in dimensions. Integrated with traditional storage units or simply as a freestanding piece of furniture, it can be further enhanced with inserts and accessories such as shelves, planter boxes and alcoves.

Before

Retrofit existing storage

Constructed using a streamlined inventory of components of steel tubing and connector units, the 800 Series modular shelving system can be modified and configured in limitless ways. It can be easily retrofitted to existing storage units to change their form and function. By enhancing existing storage units with this modular shelving system, organisations can transform their internal architecture to create more contemporary and homely spaces. Whether freestanding, or integrated with lateral files, cupboards or lockers, this solution can help to create interesting and engaging office landscapes.

After

Idea starters & enhancements

Freestanding or integrated with 800 Series storage units, this flexible system can enhance open plan architecture and space delineation, end of desk storage, meeting rooms, executive suites, media centres, display and reception areas. The system can be readily configured off-module to ensure its compatibility with any scheme and can be designed in unique ways to accommodate specific project requirements. The framework can be further enhanced with a variety of additions including:

- wood shelves & boxes
- planter boxes
- metal shelves, side & back panels
- PET felt panels
- seating with or without backrests
- tables & work surfaces
