CREATING EFFECTIVE WORKING ENVIRONMENTS

MADE IN THE UK

WORKSTATIONS, TABLES & STORAGE
CONNECT3

Connect3

KI quality & design, distilled

Connect3 distills KI's reputation for quality and design innovation into a simplified workstation and storage system. Using a streamlined inventory of components, it provides a practical, durable solution for an optimised office environment.

Quick and easy to assemble, Connect3 desks & benches feature a simple yet robust single rail understructure. Pedestals and cupboards complete the modular system to provide elegant options for personal or team storage. The Connect3 collection can seamlessly integrate with KI's wider portfolio of workplace furniture to create happy, healthy, high performing working environments.

Made in the UK | 25 year warranty*

*25 years on steel understructure, 5 years on MFC parts

Back-to-back workstations

Activity: individual, team work

Ideal for: open plan landscapes, dropdown areas

Practical yet versatile, the Connect3 back-to-back bench provides elegant workstations for traditional open plan office environments. Pure, simple functionality is facilitated by the robust single rail understructure, which can be extended indefinitely with the use of intermediate legs.

Additional options include height adjustable spacers, desk returns, cantilevered meeting ends, mass cable risers, grommets, worktop-mounted monitor arms, CPU holders and cable trays. Available with KI's full range of screen and worktop options.

Single desks

Activity: individual

Ideal for: wall-adjacent & small spaces,
cellular offices

Connect3's single rail is set well back from the user's legs. An ideal standalone solution for cellular offices or wall-adjacent workstations, they can be fitted with returns if required. Monitor arms and CPU holders are fixed to the worktop. Screens, modesty & infill panels can be added, while cable management options include scalloped worktops, grommets, and cable trays.

Pedestals

Activity: individual

Ideal for: individual workstations

A sense of place in an open plan environment has been shown to improve worker wellbeing. The Connect3 pedestal provides a simple, lockable and mobile solution for creating this anchor for workers in an open office environment. Available in two-drawer or three-drawer options, these pedestals can make a world of difference when helping workers to feel more at home in the office environment.

Cupboards

Activity: individual, or team storage

Ideal for: end of desk, or away from the desk storage

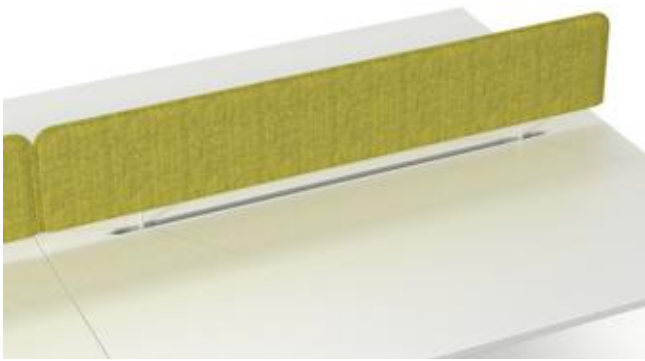

Connect3 cupboards provide a simple solution for a range of storage requirements. Available in four sizes, they can be used to define walkways, delineate space, or extend worksurfaces at the end of desks. Inheriting KI's established reputation for the best storage solutions on the market, these lockable cupboards feature soft close hinges as standard, and can be enhanced with worktops.

Screens

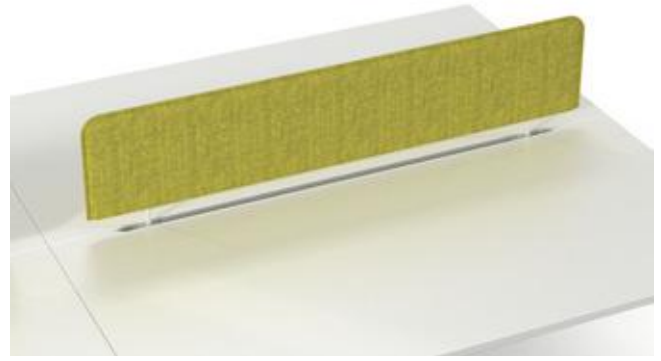

The Connect3 range can be enhanced with a wide variety of screen options. From simple fabric panels, to Perspex®, or metal frames with integrated tool rails, each of these options offer a variety of aesthetic and practical benefits.

- Inset or full width screens
- Set above, at, or below worksurface level
- Side return screens
- Floor standing screens, infill and modesty panels

The details

KI's simplest, most streamlined workstation & storage collection to date

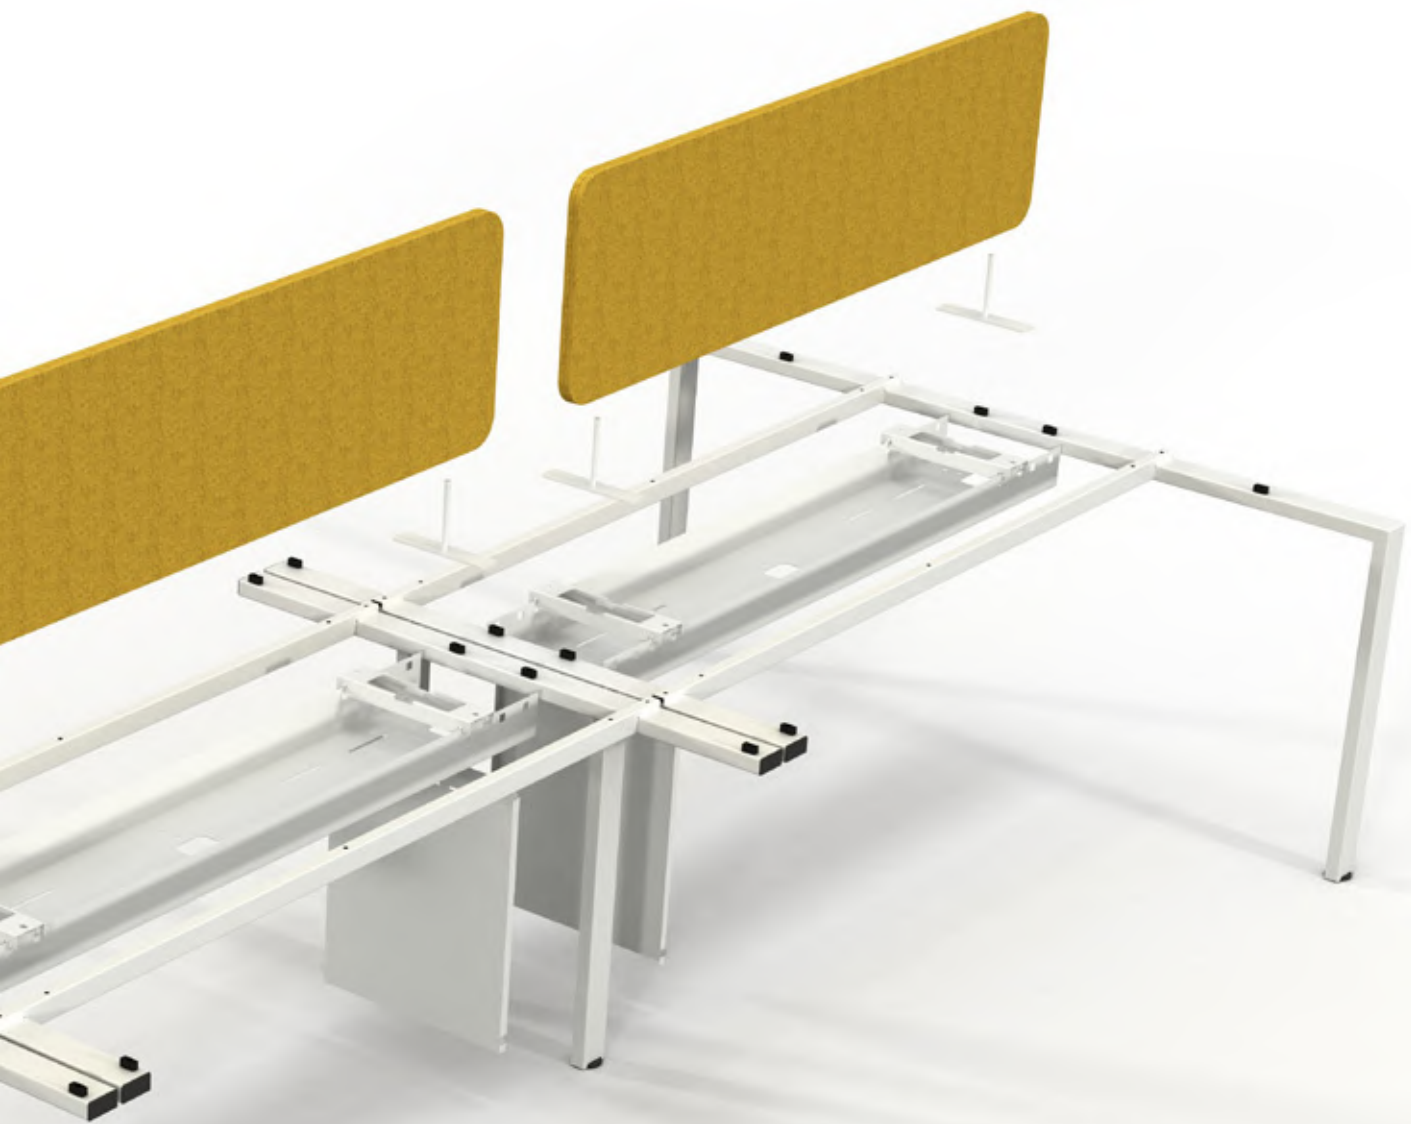

Connect3 is designed & manufactured in the UK on rapid leadtimes, consistent with the demands of the local market. Like all KI furniture, it is produced to the highest standards in modern, highly automated factories using the best quality materials and workmanship.

- 60mm x 30mm rectangular steel frame connected by single traverse rail
- Standard depths of 600, 700 and 800mm (single desks), and 1200, 1400 and 1600mm (back-to-back)
- Standard widths of 800, 1000, 1200, 1400, 1500, 1600, or 1800mm

Optional

- 740mm finished fixed-worksurface height available in all KI standard finishes
- Height adjustable spacer available in 25mm increments

IT integration and cable management

- Drop-down cable trays fixed to underside of worktop
- Intermediate leg mass cable riser for back-to-back benches
- Various options for grommets and scalloped edges for cable management

Screens & other options

- Screens at either full width or inset (refer to Finishes Guide)
- Returns and cantilevered meeting ends can be added to either single or back-to-back desks
- Modesty & end-leg infill panels
